

REDEFINING READINESS FOR THE FUTURE

Emerging defense tech promises game-changing capabilities, but limited resources and relentless threats make it difficult to vet every solution. With time and budgets stretched thin, rapid, data-driven decisions are more critical than ever.

NUAIR Defense is a trusted accelerator where innovations are rigorously **tested, validated, and integrated** across air, land, maritime, and multi-domain operations to confidently deliver **combat-ready systems and expertly trained operators** at the speed of modern warfare.

Identify & Assess

No time to vet every 'silver bullet'? We rapidly evaluate incoming technologies, identifying those with true strategic value.

Validate & Integrate

Rigorous multi-domain testing proves operational worth. If it doesn't pass here, it won't fly there.

Train & Deploy

Our LVC training hones operators for real-world action, while continuous feedback keeps warfighters ahead of shifting threats.

10+ years
of DoD & Allied
Support

Over 6,000
mission-successful
operations

Comprehensive
**Safety &
Compliance**
Programs

A Collaborative Ecosystem, Not Just Another Technology Provider

We unite innovators, regulators, operators, and decision-makers under one roof, so **only the best technologies rise above the noise**—and get fielded fast.

Real-Time Airspace Modernization

By collaborating with base airspace managers and strategic sites, we **champion BVLOS operations, bolster c-UAS capabilities, and heighten operational readiness** – all backed by over a decade of ATC collaboration.

Realistic Training for Operational Superiority

Our Center of Excellence (COE) drives testing, development, and Verification & Validation (V&V) at scale—**turning “real-world conditions” into tangible scenarios**. By fusing Live, Virtual, and Constructive (LVC) environments, we hone operator skills to a battle-hardened edge—and on the battlefield, that difference saves lives.

Accelerating Dual-Use Innovation for DoD

We fast-track SBIR, STTR, and commercial breakthroughs from lab to battlefield. No matter your size or stage—startup, mid-tier, or industry giant—we **unite the entire innovation ecosystem**, slashing red tape and bridging the gap between proof-of-concept and real-world deployment.
